The European Pupils' Competition enables students to collaborate across borders. Thanks to support from eTwinning, one of the largest European online platforms for educational exchange, school classes from different countries can work on together. This collaboration will take place within a password-protected online 'class room', called TwinSpace. Here, students will have access to various innovative tools such as blogs, chats, online notice boards and many more. In addition to being creative and varied, working with eTwinning also encourages students to develop their skill set in media and languages and fosters intercultural learning.

It's definitely worth participating: the best projects have the chance to win attractive prizes! If you have any further questions or are unsure of how to incorporate online tools into everyday school life, eTwinning's staff members will be happy to assist you.

If you are a staff member working in a school in one of the European countries and want to use eTwinning with your school class, please register first at [www.etwinning.net](http://www.etwinning.net). You can use the detailed guidelines for advice on how to get registered, create an online profile, find your projects and eTwinning partners and use the TwinSpace. Perhaps you want to try the eTwinning tools first without signing up immediately? You can do so through [eTwinning's training platform](#).

Once TwinSpace has been enabled for you, you can invite your students to participate. TwinSpace is a password-protected virtual 'class room' which offers numerous innovative tools for your students' collaborative efforts. Partner classes can communicate via email, forum or chat, use blogs to take notes on their project, draft texts together, upload worksheets, presentations and photos as well as audio and video files and finally publish the results of their project.

To enter the competition though, it will be necessary to engage in an eTwinning partnership of maximal 5 partners. Please choose one of the tasks related to the age group of your pupils.

**Closing date is 4 March 2018.**
