#### How you can fight global warming

Climate change can seem like such an enormous problem that individual actions – 00 – **would have** (have) little impact. Consider Europe's recent wide-ranging proposals – 01 –  (reduce) its reliance on fossil fuels, including eliminating sales of new gas- and diesel-powered cars in the next 14 years.

But people can have an impact, experts say, both by how they spend their money and how they spend their time. Mary Weathers Case, for instance, chose to offset the carbon cost of a cross-country plane trip for her family through the site of Gold Standard. Dr. Case, a psychiatrist – 02 –  (live) in South Salem, N.Y., with her

husband and two children, said she – 03 –  (watch) more news about climate change during

the pandemic and – 04 –  (be) motivated to do her part after hearing about the searing temperatures in the American West.

What – 05 –  (surprise) her, though, was that after spending USD 3,000 on plane tickets to Portland, Ore., she could offset that carbon for USD 150.

"I was surprised that it – 06 –  (be) so cheap," Dr. Case said. With certain investments –

namely those that reduce or remove carbon from the atmosphere – there – 07 –  (be) defined ways to measure their environmental impact. With others, like water conservation, the metrics are not as clear because there isn't an agreed upon unit – 08 –  (measure).

Sir Ronald Cohen advocates using what – 09 –  (call) impact-weighted accounts, an initiative –

10 –  (lead) by Harvard Business School, to evaluate a company's positive and negative impact

on the environment. By this measure, he – 11 –  (write) that airlines like Lufthansa and

American Airlines have an environmental impact that – 12 –  (make) both companies unprofitable.

Yet he is also open to a less-bad approach. People invested in fossil fuel companies – 13 –  (consider) that Exxon Mobil caused USD 39 billion in environmental damage from its carbon impact, while BP caused USD 14 billion in damage. "It's where the world – 14 –  (head)," Sir Ronald said.

When Leah Weinberg, owner and creative director of Color Pop Events, which plans weddings, – 15 –

[ ] (moving) from one New York neighborhood to another, she found a company that had done away with cardboard boxes. Instead, the company provides the plastic, flip-top boxes that retailers like CVS use to deliver products to stores. These reusable plastic boxes are one of the solutions.

## VOCABULARY

Read the article below. Use the word given in CAPITALS to form a word that fits in the space provided.

### Mediterranean marine life under threat

Mediterranean – 00 – **tropicalization** TROPICAL is rampant, with temperatures rising 20% faster than the – 01 – [ ] GLOBE average, fish migrating, – 02 – [ ] INVADE species appearing while native species disappear, marine angiosperm sea meadows and coral reefs being destroyed, and jellyfish populations spreading. The above – 03 – [ ] CONSEQUENT of the climate crisis on the Mediterranean are revealed in a recent World Wildlife Fund report titled 'The Climate Change Effect in the Mediterranean: Six Stories from an – 04 – [ ] HEAT Sea.' The report further expounds the six following primary effects of climate change on the Mediterranean. The increased water temperature creates tropical conditions; the result being that native species are either – 05 – [ ] PLACE or die out.

There has been a significant – 06 – [ ] EXPAND of jellyfish populations, – 07 – [ ] PARTICULAR in the southern regions, which have experienced increasingly frequent and – 08 – [ ] LENGTH population – 09 – [ ] EXPLODE. Long-term overfishing has drastically reduced fish species which previously competed with jellyfish for food, and today certain – 10 – [ ] MEN catch more jellyfish than fish.

Neptune grass meadows are threatened by – 11 – [ ] INCREASE warm waters and a rising sea level, which has had – 12 – [ ] DEVASTATE impacts on both biodiversity and 'blue-carbon' – 13 – [ ] STORE – meaning marine plants that absorb carbon dioxide from the atmosphere. It is estimated that Neptune grass meadows store 11-42% of the Mediterranean region's CO<sub>2</sub> – 14 – [ ] EMIT.

An estimated 80-100% of fan mussel populations were recently lost off Spain, Italy, and other regions due to increasing – 15 – [ ] MORTAL rates.

The WWF report points out the – 16 – [ ] DANGER relationship between the effects of climate change on the one hand and those provoked by direct human – 17 –

[ ] PRESS on marine life through overfishing, pollution, – 18 – [ ] COAST development, and sailing on the other hand.

30% of the Mediterranean would have to be protected in order to allow fish populations to recover, mitigate the effects of climate change, and ensure – 19 – [ ] SUSTAIN fishing and tourism as well as food – 20 –

[ ] SECURE and prosperity for local communities.

3. **READING COMPREHENSION**

Read the article about remote work. For questions 01-10, decide which of the sentences best fits into each of the numbered gap in the article. There are three extra sentences.

**One risk of remote work: Being forgotten**

When offices finally reopen, some companies plan to use them in a very different way than they did before the pandemic, giving workers the choice to come in just a few days a week, or not at all.

Some employees are eager – 01 –

how to monitor its promotion and pay data for signs / to making workplaces more diverse and inclusive / transfer to a different location /

putting in more hours and making more calls per minute H when it comes to humidity /

since it announced a year ago / they want to work from home full time /

to put as much into the company and the effort / where they work / our wellbeing is affected /

to return to the office full time / who planned to work primarily from home / whose study showed

as soon as they can, but others can't imagine ever going back to the way things were. Offering people more flexibility over – 02 –

our wellbeing is affected / who planned to work primarily from home / since it announced a year ago /

how to monitor its promotion and pay data for signs / they want to work from home full time /

to making workplaces more diverse and inclusive / transfer to a different location /

to return to the office full time / whose study showed /

putting in more hours and making more calls per minute H when it comes to humidity /

to put as much into the company and the effort / where they work

can help attract and retain talent, companies say.

Around 10,000 employees at Google recently applied to work remotely or – 03 –

whose study showed / to put as much into the company and the effort / our wellbeing is affected /

to return to the office full time / how to monitor its promotion and pay data for signs /

since it announced a year ago / where they work / transfer to a different location /

they want to work from home full time / who planned to work primarily from home /

to making workplaces more diverse and inclusive /

putting in more hours and making more calls per minute H when it comes to humidity

, and the company approved 85 percent of the requests. The real estate platform Zillow said more women had applied for its jobs – 04 –

transfer to a different location / since it announced a year ago / where they work /

to return to the office full time / whose study showed / they want to work from home full time /

our wellbeing is affected / who planned to work primarily from home /  
how to monitor its promotion and pay data for signs /  
putting in more hours and making more calls per minute H when it comes to humidity /  
to put as much into the company and the effort / to making workplaces more diverse and inclusive  
that most of its 5,900 employees could work from home permanently. The software company Slack, which also offered permanent remote positions last year, said that among recent hires the number of minority workers was 50 percent higher for those – 05 –  
to making workplaces more diverse and inclusive / whose study showed /  
putting in more hours and making more calls per minute H when it comes to humidity /  
since it announced a year ago / to return to the office full time / our wellbeing is affected / where they work /  
transfer to a different location / they want to work from home full time /  
how to monitor its promotion and pay data for signs / to put as much into the company and the effort /  
who planned to work primarily from home  
than for those who preferred the office.

But even as the hybrid workplace reduces some longstanding barriers, it could introduce another type of inequality. Bias against remote workers could become a new obstacle – 06 –

to making workplaces more diverse and inclusive / where they workM / since it announced a year ago /  
how to monitor its promotion and pay data for signs / to return to the office full time / our wellbeing is affected /  
they want to work from home full time / transfer to a different location /  
putting in more hours and making more calls per minute H when it comes to humidity / whose study showed /  
to put as much into the company and the effort / who planned to work primarily from home  
, say management experts and corporate executives themselves.

Though most evidence that remote workers are at a disadvantage is anecdotal, at least one study, led by researchers at Stanford University, suggests they are less likely to be promoted than their in-office peers. In the experiment, researchers randomly assigned workers at a large travel agency in Shanghai to work remotely or in the office for nine months. Though the remote workers were 13 percent more productive, – 07 –

to making workplaces more diverse and inclusive / our wellbeing is affected /  
who planned to work primarily from home / transfer to a different location / to return to the office full time /  
whose study showed / how to monitor its promotion and pay data for signs / where they work /  
putting in more hours and making more calls per minute H when it comes to humidity /  
to put as much into the company and the effort / since it announced a year ago /  
they want to work from home full time  
, they were promoted about half as often as their in-office peers.

The result is troubling partly because the desire to work remotely isn't evenly distributed, Dr Bloom said. He and his research team have conducted monthly surveys about remote work since May last year. As of March this year, among college-educated parents of young children, women have said – 08 –

putting in more hours and making more calls per minute H when it comes to humidity /  
they want to work from home full time / to making workplaces more diverse and inclusive /  
transfer to a different location / how to monitor its promotion and pay data for signs / whose study showed /  
to put as much into the company and the effort / where they work / who planned to work primarily from home /  
since it announced a year ago / to return to the office full time / our wellbeing is affected  
around 50 percent more often than men do.

The job site Indeed is considering – 09 –  
to making workplaces more diverse and inclusive / whose study showed / to return to the office full time /  
where they work / our wellbeing is affected / to put as much into the company and the effort /

they want to work from home full time / transfer to a different location /

 since it announced a year ago

that remote workers are not receiving equal treatment, similar to the way it examines data as part of its diversity and inclusion efforts, said Paul Wolfe, the firm's head of human resources. In addition to demographic factors, 'another data point will be is this employee remote, flex or in-office,' he said. Indeed, has given its 10,000 employees the option to work remotely on a permanent basis.

'Feeling like you're second class and feeling like your career opportunities are limited means you're probably not going – 10 –

to making workplaces more diverse and inclusive / where they work / they want to work from home full time /  
 to return to the office full time / our wellbeing is affected /  
 putting in more hours and making more calls per minute H when it comes to humidity /  
 since it announced a year ago / to put as much into the company and the effort /  
 who planned to work primarily from home / how to monitor its promotion and pay data for signs /  
 whose study showed / transfer to a different location

as you could,' he said.

## LISTENING COMPREHENSION

**You will hear five texts about what your tongue is telling you about your health. For texts A-E match statements 01-08 that summarise treatments. Three statements do not directly match the texts. You will score five points.**

- 1 - If you suspect you have it, see your GP. Unlike other yeast infections, it can be treated with an over-the-counter product.
- 2 - Drink plenty of water, cut down on acidic drinks, and visit your doctor to find out if you should be taking vitamin supplements.
- 3 - When you have a red or white patch on the tongue that won't go away and isn't geographic tongue, visit your dentist.
- 4 - If they are accompanied by a fever, you have difficulty swallowing, or the sores last more than three weeks, visit a doctor, pronto.
- 5 - Pain when swallowing or pain in the ear can be signs of conditions when you need to see your GP.
- 6 - If you have any concerns, get your tongue checked out by a dentist, who can clean out the fissures and recommend oral hygiene practices.
- 7 - They can be removed by your doctor or dentist. Larger leukoplakia patches will require oral surgery.
- 8 - If you have any concerns, check with your GP to make quite sure.
